Zombeer License

About This Game

From the delicious brains of **Moonbite Games PadaOne Games** and **U&I Entertainment** comes an enhanced and updated version of Zombeer, a first-person shooter that is an unapologetically irreverent homage to everything kick-ass about zombie movies and drinking beer.

With new narrative content from writers at Comedy Central, Zombeer is packed with humorous reference to classic zombie flicks of the past and, of course, a healthy supply of ammo and beer.

In the near (and some might say lucky) future, there is a pandemic as a result of a virus that transforms the world's population into zombies. That's not the lucky part – it's this: Once bitten by a zombie, the only way to stave off the infection is drinking beer!

Playing as the hero "K," a survivor inflicted with the zombie virus and a wicked perpetual hangover, players must make their way through the zombie apocalypse managing a balance of sobriety and carnage to find his girlfriend Karen and get out before it's too late!

Sigh... I wish there were more games like this. Even though I encounter a bug during a quick time even that is keeping me from finishing it, I still love this game.
